**XVII. Security**

**Security arrangements**

89. The main venue and adjacent territories where parallel events are held (Blue zone) will be under the jurisdiction of the United Nations.

90. The host country will provide support with regard to security issues if necessary, in areas adjacent to the Blue Zone as well as other facilities that are not part of the Conference.
91. The Habitat III Security Office will operate from 7.30 a.m. to 5.30 p.m. The Security Office:

- Receives official telephone calls requiring action after normal working hours
- Assists in locating and notifying the Organization’s senior officials in an emergency
- Liaises with national security representatives regarding security arrangements for dignitaries
- Liaises with local authorities whenever outside emergency assistance is required, e.g. ambulance, medical, police
- Handles lost and found property

92. Strict security measures are observed at Habitat III Conference Headquarters. Metal detectors will be operating at the entrance to the venue and participants are requested to wear their identification badges at all times. Participants are advised not to leave briefcases or any valuable items unattended in conference rooms. Should participants smell smoke or should there be the slightest sign of a fire or any other danger, they should call 911 immediately and leave the premises.

**Personal valuables**

93. Once participants have checked into their hotels it is advisable to leave important identity documents in the hotel safe and to carry photocopies. Participants are advised to carry their valuables safely when in the street, especially when using public transport, as pickpockets may be operating.

**Natural disasters**

**Volcanoes**

94. There are a number of active volcanoes in Ecuador. You should monitor media reports and the website of the National Ecuadorian Geophysics Institute (in Spanish) for the latest information on volcanic activity. If you are planning to climb one of the volcanoes in Ecuador, you should contract an official mountaineering guide. Official bulletins are issued via the Ministry of Security Co-ordination and their Twitter account: @Seguridad_Ec.

95. Volcanic activity has been moderate to low over recent months. The local authorities have allocated official shelters throughout the vulnerable areas. At the beginning of October 2015, early warning sirens were installed in the Los Chillos and Tumbaco valleys and in other surrounding areas. Quito city centre is considered a safe area.

96. The official authorities continue to advise people in the vulnerable provinces to have a home emergency backpack ready, with water, tinned food, disposable face masks, goggles and a first aid kit. You should also monitor media reports and the website of the National Ecuadorian Geophysics Institute (in Spanish) for the latest information on volcanic activity, at [www.igepn.edu.ec/](http://www.igepn.edu.ec/).
Earth tremors

97. Since Ecuador is located in an active seismic area, there are frequent earth tremors, but these rarely cause any damage or casualties. However, as Ecuador is located in the Pacific Ocean Ring of Fire, the earthquake risk is very high. On 16 April 2016, at 6.58 p.m., an earthquake with a preliminary magnitude of 7.8 struck the north-western coast of Ecuador, between Manabí and Esmeraldas provinces, causing over 650 deaths and widespread damage to infrastructure. Aftershocks are still occurring and may be felt for months.

98. While in Ecuador you should follow the advice of the Ecuadorian National Risk Control Agency and the Seismic Monitoring Agency. More about what to do before, during and after an earthquake is available online from the United States Federal Emergency Management Agency or other specialized agencies at www.ready.gov/earthquakes.

Other risks

99. All participants are recommended to take out comprehensive travel and medical insurance before they travel.

100. Detailed further information on other risks is available online at travelhealthpro.org.uk/locations/Ecuador/#Other_risks.

Altitude sickness

101. The highest point of elevation in Ecuador is over 2,500 metres (m) and Quito is at 2,819 m. Travellers should spend a few days at an altitude below 3,000 m above mean sea level.

102. Travellers should avoid travelling from altitudes of less than 1,200 m to altitudes greater than 3,500 m in a single day. Ascent above 3,000 m should be gradual. Travellers should avoid increasing sleeping altitude by more than 500 m a day and take a rest day (at the same altitude) every three or four days. Travellers who develop symptoms of acute mountain sickness (AMS) (headache, fatigue, loss of appetite, nausea and sleep disturbance) should avoid further ascent. In the absence of improvement or with progression of symptoms the first response should be to descend. Acetazolamide can be used to assist with acclimatization, but should not replace gradual ascent.

103. There are three syndromes: AMS, high-altitude cerebral edema (HACE) and high-altitude pulmonary edema (HAPE). HACE and HAPE require immediate descent and medical treatment. Development of the symptoms of HACE or HAPE requires immediate descent and emergency medical treatment. Drink water and remain hydrated.

Dengue

104. Dengue is known or has the potential to occur in Ecuador. Dengue is a viral infection transmitted by mosquitoes, which predominantly feed between dawn and dusk. It causes a flu-like illness, which can occasionally develop into a more serious life-threatening form of the disease. Severe dengue is rare in travellers going to Quito.
105. All travellers should avoid mosquito bites, particularly between dawn and dusk. There is no vaccination or medication to prevent dengue.

**Zika**

106. Some cases of locally-transmitted Zika virus have been confirmed in the last three months. You should follow the advice of your own national travel health network or centre and discuss your travel plans with your health-care provider, particularly if you are pregnant or planning to become pregnant.

**Terrorism and other crime**

107. Cases of armed robbery and petty crime may occur. Nevertheless, many tourists visit Ecuador every year and most visits are trouble-free. There is a low threat of terrorism.

**XVIII. Health services and vaccines required**

108. Any medical costs incurred during the stay in Quito will be covered by participants directly. It is therefore strongly recommended that participants arrange for their own health insurance.

109. For the duration of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) the Government of Ecuador has put in place the following measures:

- Medical teams in the Blue Zone for emergency care
- Reinforcement of health staff and specialized medical teams in all establishments surrounding the venue and partner hotels
- Health teams for emergency care at five-star hotels (Sheraton, Dann Carlton, Marriott, Hilton Colon, Best Western, Swissotel and Hotel Quito (seven doctors and seven nurses))
- Medical teams at the busiest sites: the airport, Casa de la Cultura and the Blue Zone; and enhanced human resources and other requirements in health facility emergency services

110. A suggested list of hospitals in Quito is provided below.
111. A medical room is located on the ground floor at the venue and is open from 7.30 a.m. to 7.30 p.m. on meeting days. First aid will be provided free of charge. For all medication and medical services provided by clinics, hospitals, pharmacies or other health-care institutions, delegates must pay the service providers directly.

**Vaccines required**

112. When entering the country at ports, airports and border crossings, participants will be requested to voluntarily show the international certificate of yellow fever vaccination if coming from a country or area declared by the World Health Organization as “high risk”. This will be compulsory for participants coming from three countries with active yellow fever transmission (Angola, Democratic Republic of the Congo and Uganda).
113. Delegates are requested to report to their embassies and the Habitat III secretariat (see http://habitat3secretariat@un.org; habitat3ecuador@un.org) when departing from a country considered of risk for transmission and with active outbreaks of yellow fever or coming from the Amazonian provinces of Ecuador; vaccination should be performed a minimum of 10 days prior to arrival to Ecuador.

114. The United States Centers for Disease Control and Prevention, recommend all travellers to Ecuador to have routine vaccinations including:

- Flu
- Td (Tetanus, Diphtheria)
- Tdap (Tetanus, Diphtheria, Pertussis)
- HPV
- Shingles
- Pneumococcal
- Meningococcal
- Hepatitis A
- Hepatitis B

115. If you need emergency medical assistance during your trip, dial 911 and ask for an ambulance. You should also contact your insurance/medical assistance company promptly if you are referred to a medical facility for treatment.

116. Emergency telephone numbers in Ecuador are as follows:

- Emergency and Ambulance: 911

XX. Currency

117. The currency of Ecuador is the United States dollar. Bills over 20 dollars are hard to change; bring bills of smaller denominations or change larger notes at hotels, expensive restaurants, etc. Ecuador issues 5- 10 - 25- and 50-cent coins, which are equivalent to United States coins, as well as a 1-dollar coin; however, these are only accepted in Ecuador. Euros may be exchanged for United States dollars at banks, hotels and money exchange offices. Foreign currency can be
exchanged at Quito International Airport, banks, foreign currency exchange bureaux or hotels.

XXI. **Telephone communications and mobile telephones**

XXII. **Electricity and power outlets**

120. Electrical power is 110-120 volts and 60 cycles AC is used. Most outlets are for two flat prongs (as in North America). It is advisable to have an outlet adaptor and to check the voltage of each device before plugging it into an outlet.

XXIII. **Climate**

121. Even though Quito is in the tropics and the Equator runs through the city, the weather can get cold owing to the high altitude. For October, the average high is 20°C (66°F) and the average low is 10°C (50°F).
XXIV. **Other useful information**

Currency exchange facilities and banks are also open on Saturday morning and on weekdays only at major hotels and malls. ATMs can be found in all the main cities. Cash withdrawals can be made at most banks or ATMs. In remote areas, banking facilities are not available and the use of credit cards is less common, so it is advisable to carry cash.

125. Most international Visa and MasterCard, Diners Club and American Express cards are widely accepted at hotels, department stores, shops, restaurants and pubs. When paying with credit and debit cards, you will be asked to provide ID.

126. A 14 per cent sales tax is added to all purchases in Ecuador. A service tax of 10 per cent is nearly always added to hotel and restaurant bills. In Quito, there is also a small city hotel tax.

Restaurants and food
132. Ecuador is a fertile country where the weather is spring-like all year long. Whenever you buy in any city, you have the advantage of buying locally harvested products, which are cheap and fresh all year round. In Quito there are markets that date back to pre-Inca times, when everybody exchanged goods. This style of interaction is still alive in the popular markets and fairs in Quito.
133. If you prefer to buy in a supermarket, there are large supermarket chains in Quito, similar to those in other countries, which are open seven days a week and which offer a great variety of high-quality products, both local and imported, and there is always one close by.

134. Some general recommendations: check the dates on packaged goods and make sure that the packaging is intact and that the seal has not been broken. At markets and fairs you can haggle, so practise your bartering skills to get the best price.

**Ecuadorian cuisine**

135. Ecuadorian cuisine is diverse and delicious, with traditional dishes influenced by the indigenous diet and the mix of other cultures, which have given rise to authentic dishes such as locro, chicharrón, fritada and the delicious ceviche. Quito, the capital of Ecuador, offers its visitors an excellent selection of food and restaurants. With numerous restaurants and small food stalls, in Quito and the surrounding areas, you will have the opportunity to enjoy food ranging from French fries to filet mignon. Prices vary from place to place.

136. Besides Ecuadorian cuisine there is also a great variety of international (Spanish, Italian, French, Chinese etc.) dishes, together with local specialities. The quality of the food varies, as do the prices, which vary from very cheap to very expensive, but are relatively low compared with prices abroad. Ecuadorian cuisine is cheaper than international cuisine, while wines are usually imported and expensive. Depending on the service, it is recommended to leave a tip.

137. Restaurants in Quito generally open from noon onwards. Lunchtime is from approximately 12.30 p.m. to 3 p.m. at the latest. More exclusive restaurants are generally open until midnight. It is recommended to arrive early to be sure of getting a table, especially on weekends. Popular restaurants are full during peak hours.

138. There is no specific area for restaurants in Quito, although many are near the nightlife areas, for example, on Amazonas Avenue, not far from the Conference venue and in the neighbouring streets there is a variety of restaurants.

139. All types of fast food, from the well-known international chains to national options, are available in Quito. Fast-food restaurants can be found on the main streets of the city and there are food courts in the large shopping centres, offering a variety of food and prices.
