HABITAT III

URBAN FUTURE REPORT

Concise summary of the app or technology promoted during the event	<p>The "Compass" application consists of a series of questions and answers weighted performed individually or collectively between neighbors interested in improving their habitat. It provides a synthesis diamond-shaped diagram representing the level of compliance with human rights at its upper edge, level of social organization, the lower shaft; level public works under construction and regulations applied in the horizontal axis. The methodology provides an expedited discussion aimed at discovering problems specific territory, is a segregated neighborhood, a rural town, a city or a region, systematizing available information available from official sources or provided orally by the knowledge of neighbors. The diagram of the Compass seeks to build consensus among neighbors about their priority issues as a basis for discussion regarding the best alternative for its approach from the participation of all concerned.</p>
