

Open-Ended Informal Consultative Meetings

Panel on Urban Services and Technologies

New York, 27 April 2016

Vision for urban services

- Access for all to good living conditions and urban opportunities.
- Sustainable and efficient use of urban infrastructures and services.
- Adequate and stable funding.

Recommendations for national governments

- Provide local governments with mandate and means to deliver urban services.
- Establish adequate frameworks for procurement and appraisal of urban services.
- Encourage sustainable behaviour and consumption (e.g. energy taxation).

Recommendations for local governments

- Set out a vision for the city and lead its implementation in close coordination with civil society and business community.
- Champion integrated urban strategies, including housing and mobility.
- Use technology to serve vision for the city.

Recommendations for international institutions

- Facilitate knowledge exchange and capacity building.
- Support local action and leverage funding.
- Develop capacity to quantify targets and measure outcomes.
