

SEMINAR: THE ROLE OF IT IN REDUCING CORRUPTION LEVELS IN THE MUNICIPAL GOVERNMENT FROM THE VIEWPOINT OF ACADEMICIANS AND PRACTITIONERS	
ORGANIZATION (PARTNER ORGANIZATIONS)	Universitas Airlangga
DATE/TIME	28 July, 9:00 a.m. - 12:00 p.m.
VENUE	Aula Fadjar Notonegoro, Faculty of Economics and Business, Universitas Airlangga
OPEN/CLOSED EVENT	Open
DESCRIPTION	<p>This seminar aims to share the best practice in reducing corruption levels conducted by the municipal government by utilizing information technology. This seminar will be attended by academicians and practitioners from about 190 UN Habitat countries. It will be discussed regarding the role of IT in reducing corruption levels in the municipal government which is proved to be quite significant. The utilization of IT in this case is through e-budgeting and e-procurement. E-budgeting is a system of creating government budget electronically, online, and integrated from all units using single database. Along with the implementation of e-budgeting, e-procurement which is the web-based application system that provides various facilities and information related to procurement process of goods and services is applied as well. This utilization of IT is quite effective and efficient in reducing corruption levels in the municipal government.</p>
